

ELECTHRON AIRDROP

Yes, we know, the free NFT that you are going to receive or that you have just received is not a Bored APE, nor any other worth millions of dollars, but rather it is what we call **UTILITY NFT**, because it is a useful NFT, instead of of an NFT with nice drawings, although you are sure to love this NFT.

The unique code that this NFT has will allow you to store **ELECTHRONS**, our cryptocurrency, before it goes on the market, for free. The Electrons you earn will be delivered to your wallet for free, without you having to take any additional action. The **ELECTHRONS** and additional prizes you earn, such as other NFTs, by participating in our airdrop will be delivered to you when our blockchain is implemented.

To accumulate **ELECTHRONS** you just have to perform some tasks, participate in the lottery, hold the NFT that we have given you or those that you have bought, be active and participate in the activities that we have prepared and that we will share. We've designed a host of activities to make collecting **ELECTHRONS** fun and exciting. Think of it as a treasure hunt.

We will distribute **20,000,000 ELECTHRONS** among all those who participate in this airdrop, which will take place prior to the launch of our cryptocurrency and before the **ELECTHRONS** are sold to the public. We recommend you read the Whitepaper to learn more about our hybrid financial ecosystem.

[Electrons_Elth](https://twitter.com/Electrons_Elth)

[Electrons_Elth](https://discord.com/invite/Electrons_Elth)

We do things this way, because we believe that the greatest value a crypto ecosystem can have is the community that supports it. We know of many crypto projects that forget about their communities when they launch their tokens or cryptocurrencies.

We want to let our community know that we are different from everyone else. For us, the community is what keeps our ecosystem alive and functioning, that is why we want to distribute these 20,000,000 ELECTHRONS among our community, with activities in which anyone can easily participate, without limitations, with the same opportunities to participate and win.

We have created a series of games and activities that you can play to earn ELECTHRONS, before its release. You decide how many ELECTHRONS you get to earn for free before the launch of our financial ecosystem. It is not necessary for you to buy any NFT, you can store ELECTHRONS with the free NFT that we are giving you, you just have to be active and participate, doing the tasks that we will be proposing and paying attention. That is all.

Only if you want to increase your chances of winning and get more ELECTHRONS and higher prizes, you can choose to buy the AIRDROP NFTs or the NFT CHESTS, which we sell in OPENSEA, but you will win free ELECTHRONS with or without them, to win prizes and ELECTHRONS you only need have 1 of the free NFTs that we give you. The choice is yours.

This is an open airdrop for everyone, without any limitations, easy to understand, you can win ELECTHRONS without having previously bought anything, without investing, you just have to participate and have fun.

IMPORTANT CONSIDERATIONS.

- To activate and keep your NFTs activated and win prizes, store Electhrns and more, it is necessary that you follow us with your social network accounts, so you will stay informed of everything we do and because we will inform you of everything on our social networks.**
- You must always activate the codes of your NFTs using our Telegram Bot, so that you start storing your Electhrns, prizes and you can participate in this Airdrop. If you don't activate them we won't be able to track your progress and help you store your rewards and Electhrns.**
- If the 20,000,000 ELECTHRONS are distributed in a week, in a month, in a year, it depends only on the community. If everyone jumps in and plays, the ELECTHRONS we're giving out to the community will run out soon, so you need to take the opportunity to win as many ELECTHRONS as you can.**
- All information, about the amount of ELECTHRONS and prizes that each user wins, will be published in a public document of GOOGLE SHEETS. In this document only public data will be shown, such as the amount of ELECTHRONS or prizes that each user has won. But more sensitive data will be hidden, such as the addresses of the wallets, in which we will later deposit everything you**

have earned. So you can be calm, your data is safe here.

- When claiming your free NFT to participate in the AIRDROP, we will not charge you anything to get it, but to mint the NFT, you have to pay the gas fee which is not up to us. We have preferred POLYGON/MATIC because their gas rates are low. We have chosen OPENSEA because it is the largest NFT market that exists so far and it is a market that everyone knows and is easy to use and understand.
- The ELECTHRONS and prizes that you have stored will be sent to your wallet for free, without you having to do anything, from the moment you accumulate them, they are yours so that you can do everything you want when you receive them. But you will have to be patient because they will be deposited after the financial ecosystem has been launched, once we have finished the private sale, in which you can also participate if you want, the link is on our website.
- The ELECTHRONS and prizes you win are stored in the unique NFT code, which is automatically transcribed to the GOOGLE SHEETS document, when our team has reviewed the results or carried out the draws.
- When we have finished the AIRDROP, we will send all the ELECTHRONS and prizes you have won to the wallet associated with the unique codes.
- If you have several unique codes associated with the same wallet or have claimed several free NFTs, with different accounts and wallets, we recommend that you accumulate everything in a single account and in a single wallet only when you have received all your prizes.
- You must consider that we will launch a new chain of blocks, so it is very likely that you will have to add the data of our chain of blocks to your wallet in order to receive the ELECTHRONS that you have accumulated, but we will be reporting all this on our social networks, so we recommend you to be attentive, to receive any news.
- We recommend you to be attentive to our social networks, because there we will publish everything related to our financial ecosystem, the airdrop and more, such as games, contests, prizes, launch dates of each of the platforms, launch dates of the entire ecosystem in general and news about what we do. It will be much easier for you to participate if you stay active and updated about the content on our social networks.
- There are three types of unique codes, the “ELTH”, which are free NFTs, of which we will give away 10,000. The “ARDP” which are the NFTs that you can buy to increase your chances of winning. The “ARK” which are the chest NFTs that bring fixed prizes inside. With any of those NFTs you can accumulate ELECTHRONS and prizes. But it is important that you register them so that they are valid and begin to accumulate ELECTHRONS and prizes. But once registered, we recommend that you do not give them away or change them to other wallets, because they will lose all their content.

- If you have different wallets and multiple social media accounts, you can claim as many free NFTs as you want, but you can only have one free NFT per wallet and per social media. If you register more than one free NFT per wallet, only the first one will be valid, the other will be canceled and you will not be able to receive ELECTHRONS or prizes. If you want to claim several free NFTs, we recommend using different accounts and different wallets, so you don't run the risk of losing what you have earned. So you can continue participating without problems and earn much more.

WE WILL TALK ABOUT NFT AND UNIQUE CODES.

All AIRDROP NFTs have unique and unrepeatable codes.

ELTH.

The NFTs that start with ELTH are the free NFTs that you can claim without paying anything and that allow you to store ELECTHRONS and prizes, participating in the community.

You can only have 1 associate per wallet and social networks, because we want them to reach as many people as possible.

The free NFTs will allow you to win ELECTHRONS, participate in games, win NFTs, NFT 2.0 creatures, properties in the metaverse, in the raffles and games that we will carry out, but to win you must stay active and participate in community activities.

The free NFTs allow you to also participate in a simplified lottery that we will carry out every week, where we will award ELECTHRONS and prizes to the winners.

It is important to mention that free NFTs only earn ELECTHRONS and prizes for participation, they do not accumulate anything automatically, like the other NFTs.

The value for minting one of these NFTs is completely free, but you must pay the gas fee for minting it, that is not up to us. To activate the free NFTs, you must register them using our TELEGRAM BOT, which you can access through our website or on the mining page.

ARDP.

NFTs beginning with ARDP are the official AIRDROP NFTs. These allow you to store better prizes than free NFTs and larger amounts of ELECTHRONS, higher value NFTs and more interesting prizes.

Of the official NFTs of the AIRDROP you can have as many as you want associated in your wallets, because of these NFTs we will always be creating more according to demand, until the AIRDROP ends.

The official AIRDROP NFTs allow you to participate in the weekly lottery, where you can win large amounts of ELECTHRONS by drawing, creature NFTs, land and properties in the metaverse and many

interesting prizes.

The official AIRDROP NFTs, just for holding them, allow you to earn ELECTHRONS automatically and weekly. The ELECTHRONS that you earn weekly will vary according to the availability of ELECTHRONS that we have to deliver, which we will notify on our social networks.

Official NFTs also give you rewards for participating in activities on our social networks. The more official NFTs you have, the more ELECTHRONS you will earn for participating and you will have the chance to win prizes, because they have a cumulative effect.

Although each AIRDROP activity is different and has its own rules, which you should review before participating. In some of the activities you will have to spread content, in others we will challenge you or you will have to send us photos or creations and there will be varied activities. If you have multiple official AIRDROP NFTs, any prizes you win will be multiplied by the number of unique codes starting with ARDP you have accumulated.

For example, if you earn 0.1 ELECTHRONS for participating in an activity, if you have 5 official NFTs from the AIRDROP it could become 1, 2, 3 or more ELECTHRONS according to the rules of the activity, where the multiplier effect will be mentioned if you have official NFTs of the AIRDROP.

Contrary to free NFTs, official AIRDROP NFTs can be sold, given away or transferred to other people. But if someone registers any of the official AIRDROP NFTs, with a code that belongs to another person, our team will do a review and if the transaction has been carried out correctly, all the prizes they have accumulated will be lost and that person, the one to which the NFT was transferred, must start from scratch to accumulate prizes. Because the prizes obtained are not transferable and will be returned to the system to deliver more prizes to other people. We do it this way because, to prevent theft and fraud, our team reviews all transactions manually.

Remember to register the NFTs, in order to activate them, if you don't register them, they won't accumulate anything. If you register them, we will know how many NFTs you have bought and we will be able to give you all your prizes correctly and you will be able to accumulate your ELECTHRONS automatically and you will be able to receive the multiplier and cumulative effect that the official AIRDROP NFTs give you.

ARK.

All chest NFTs come with prepared prizes. That is, you win without raffles, without lotteries, without doing anything more than opening them. Simply by opening the chest you can win from 10,000 ELECTHRONS, to lands or properties in the metaverse, costume, utility NFTs, multiplication, many other prizes. You can see the complete list of prizes in the document available on the website.

You can buy and open as many chest NFTs as you want, you can have an unlimited number of chests associated with your accounts. We will be creating these NFTs on demand until the AIRDROP is over and all the prizes you can get by opening them will always be interesting.

Chest NFTs, just for holding them, allow you to earn ELECTHRONS automatically and weekly. The ELECTHRONS that you earn weekly will vary according to the availability of ELECTHRONS that we have to deliver, which we will notify on our social networks.

Chest NFTs also give you rewards for participating in our social media activities. The more chest NFTs you have, the more ELECTHRONS you will earn for participating and you will have a chance to win prizes, because they have the same cumulative effect as the official AIRDROP NFTs.

Although each AIRDROP activity is different and has its own rules, which you should review before participating. In some of the activities you will have to spread content, in others we will challenge you or you will have to send us photos or creations and there will be varied activities. If you have multiple AIRDROP chest NFTs, any prizes you win will be multiplied by the number of unique codes starting with ARK you have accumulated.

For example, if you earn 0.1 ELECTHRONS for participating in an activity, if you have 5 chest NFTs it could turn into 1, 2, 3 or more ELECTHRONS according to the activity rules, where the multiplier effect will be mentioned if you have chest NFTs .

Contrary to free NFTs, chest NFTs can be sold, given away or given to other people. But if someone registers any of the chest NFTs, with a code that belongs to another person, our team will do a review and if the transaction has been carried out correctly, all the prizes they have accumulated will be lost and that person, at the same time, that the NFT was transferred to him, he must start from scratch to accumulate prizes. Because the prizes are not transferable and are returned to the system to be delivered again. We do it this way because, to prevent theft and fraud, our team reviews all transactions manually.

HOW TO GET MORE UNIQUE CODES.

If you want to increase your chances of winning and get more ELECTHRONS, more prizes, more NFTs, you can buy more NFTs to participate in this AIRDROP, in OPENSEA. There are two types of NFTs that you can buy, the official AIRDROP NFTs, or the NFT chests, each one allows you to accumulate, increase and win many more prizes, improving your chances of having better profits. Official AIRDROP NFTs have a unique code starting with “ARDP” and NFT chests have a code starting with “ARK” and you can have as many NFTs as you want.

To buy more NFTs and increase your chances of earning more ELECTHRONS, you just have to mint these NFTs from our website. The NFTs you can buy at OPENSEA have the same function as free NFTs and also allow you to accumulate more ELECTHRONS, but they also have various advantages that free NFTs do not have. Of these NFTs you can have as many as you want, because they will allow you to accumulate even more ELECTHRONS in your wallet.

To add the new unique codes you have purchased, use the Telegram Bot, just like you do with free

NFTs.

DIFFERENCE BETWEEN THE TYPES OF NFT.

These are the main differences between the free NFT and the other NFTs in this AIRDROP:

ELTH

- They are completely free, except for the gas fee.
- There can only be one associated by wallet and social networks.
- They give you prizes for participating in games and activities.
- They do not have a cumulative effect, for participating in the activities.
- They participate in a simplified lottery, which awards smaller prizes.
- They do not accumulate ELECTHRONS by holding them.
- When they are sold, given away or transferred, they lose all the prizes they have accumulated.
- To start receiving prizes, they must be activated using the TELEGRAM BOT that we have enabled for it.
- They do not have prizes fixed in advance.

ARDP

- You must pay for them.
- You can have an unlimited number of these NFTs.
- They give you prizes for participating in games and activities.
- They have a cumulative effect, for participating in the activities, according to the rules of the activity.
- They participate in the full lottery where you can win better and bigger prizes than in the simplified lottery.
- They accumulate ELECTHRONS weekly by holding them, according to the availability of ELECTHRONS each week.
- When they are sold, given away or transferred, they lose all the prizes they have accumulated.
- To start receiving prizes, they must be activated using the TELEGRAM BOT that we have enabled for it.
- They do not have prizes fixed in advance.

ARK

- You must pay for them.
- You can have an unlimited number of these NFTs.
- They give you prizes for participating in games and activities.
- They have a cumulative effect, for participating in the activities, according to the rules of the activity.

- They participate in the full lottery where you can win better and bigger prizes than in the simplified lottery.
- They accumulate ELECTHRONS weekly by holding them, according to the availability of ELECTHRONS each week.
- When they are sold, given away or assigned, they lose all the prizes they have accumulated.
- To start receiving prizes, they must be activated using the TELEGRAM BOT that we have enabled for it.
- The prizes inside the chests are fixed in advance.

HOW TO TAKE PART.

It is simple:

Step 1. You enter the link, mint your free NFT, which has a cost of \$0, but you have to pay the POLYGON/MATIC gas fee (this is not up to us). You can also buy as many official AIRDROP NFTs or chest NFTs as you like. The link is on our website.

***Step 2.** You must activate the unique code by registering the NFT in the Telegram BOT. All NFTs must be activated to be valid.

Step 3. You participate in the activities and we take care of the rest.

HOW TO EARN ELECTRONS.

You can earn ELECTHRONS by participating in the community, sharing images, videos and our content on social networks. You also get ELECTHRONS by doing tasks and having a blast with our activities. That is all.

We will give ELECTHRONS for sharing content on social networks and for winning contests or simply being active. We will be posting content, assignments, and instructions on all of our social media. That's why we invite you to participate, because each activity gives you a different amount of ELECTHRONS and has different characteristics. We will be detailing everything at all times.

All NFTs with a unique code that you have bought on OPENSEA and that start with "ARDP" and "ARK", store ELECTHRONS automatically on a weekly basis, depending on the amount of ELECTHRONS available to distribute.

WEEKLY LOTTERY

We will hold a weekly raffle, to give away between 5 and 10,000 ELECTHRONS among all those who have an NFT with a unique code (including free NFTs and those that have been purchased), which must have been registered using the Telegram BOT.

All NFTs with a unique AIRDROP code participate in the lottery, including those that do not have an owner. There will be a weekly giveaway for each category. That is, there will be a weekly draw for free NFTs, which will have prizes according to their category, and a weekly draw for NFTs that have been purchased. Both draws will be at the same time and each will have a single winner.

If the NFT has an owner, the prize will be stored in the lottery winner's account, in the public document of GOOGLE SHEETS. All accumulated ELECTHRONS will be automatically sent to all holders, when our blockchain is launched.

If the winning code is not associated with any wallet, the prize will be declared void and the prize ELECTHRONS will be used for other community prizes. For this reason, it is convenient to have several unique codes associated with the same wallet, because that way you have more possibilities of winning many more ELECTHRONS.

*Each lottery awards different prizes. The lottery for free NFTs gives basic prizes and few Electrons and prizes. The lottery for NFTs purchased at OpenSea delivers bigger prizes and allows you to participate for NFT 2.0 creatures type special, properties in our metaverse, various utilitarian NFTs and much more.

HOW TO PREVENT SCAMS

- We recommend you follow the official channels of our ecosystem, social networks are published on our website and everywhere. To avoid scams consider the following:
- We will never ask you for sensitive data, such as passwords, codes and others. We will only ask you for public data, such as your public wallet address, your Nick on social networks, similar data.
- If we need sensitive data from someone, we will always notify you publicly first, so that person can contact us. We will always use the official contact channels, provided by the user.
- If we speak to you for any reason, we will always do so through official channels. We will never send you messages requesting anything, everything is always published on social networks and you will have to contact us.
- Report those who want to scam you, using the name of our ecosystem or our cryptocurrency, so that we let the rest of our community know through our social networks. This is how we take care of each other.
- Always communicate with us through our social networks. Keep in mind that we get a lot of requests, so be patient, we'll get back to you, but it might take a while. Although we try to respond to everyone quickly.
