

ELECTHRON AIRDROP

Yes, we know, the free NFT that you are going to receive or that you have just received is not a Bored APE, nor any other worth millions of dollars, but rather it is what we call UTILITY NFT, because it is a useful NFT, instead of an NFT with nice drawings, although you will surely love this NFT.

The unique code that this NFT has will allow you to store ELECTHRONS, our cryptocurrency, before it goes on the market, for free. The ELECTHRONS you earn will be delivered to your wallet for free, without you having to take any additional action. The ELECTHRONS and additional prizes you earn, such as other NFTs, by participating in our airdrop will be delivered to you when our blockchain is implemented.

To accumulate ELECTHRONS you only have to perform some tasks, participate in the lottery, hold the NFT that we have given you or those that you have bought, be active and participate in the activities that we have prepared and that we will share. We've designed a host of activities to make collecting ELECTHRONS fun and exciting. Think of it as a treasure hunt.

We will distribute 20,000,000 ELECTHRONS among all those who participate in

Electrons.github.io

[Electrons_Elth](https://twitter.com/Electrons_Elth)

[Electrons_Elth](https://discord.com/invite/Electrons_Elth)

this airdrop, which will take place prior to the launch of our cryptocurrency and before the ELECTHRONS are sold to the public. We recommend you read the Whi-tepaper to learn more about our hybrid financial ecosystem.

We do things this way, because we believe that the greatest value a crypto ecosystem can have is the community that supports it. We know of many crypto projects that forget about their communities when they launch their tokens or cryptocurrencies. We want to let our community know that we are different from everyone else. For us, the community is what keeps our ecosystem alive and functioning, that is why we want to distribute these 20,000,000 ELECTHRONS among our community, with activities in which anyone can easily participate, without limitations, with the same opportunities to participate and win.

We have created a series of games and activities that you can play to earn ELECTHRONS, before its release. You decide how many ELECTHRONS you get to earn for free before the launch of our financial ecosystem. It is not necessary for you to buy any NFT, you can store ELECTHRONS with the free NFT that we are giving you, you just have to be active and participate, doing the tasks that we will be proposing and paying attention. That is all.

Only if you want to increase your chances of winning and win more ELECTHRONS and prizes, you can choose to buy the AIRDROP NFTs, which we sell at OPENSEA, but you will win free ELECTHRONS with or without them. There the decision is yours.

This is an open airdrop for everyone, without any limitations, easy to understand, you can win ELECTHRONS without having previously bought anything, without investing, you just have to participate and have fun.

IMPORTANT CONSIDERATIONS.

- If the 20,000,000 ELECTHRONS are distributed in a week, in a month, in a year, it depends only on the community. If everyone jumps in and plays, the ELECTHRONS we're giving out to the community will run out soon, so you need to take the opportunity to win as many ELECTHRONS as you can.**
- All information, about who earns what amount of ELECTHRONS, will be published in a public GOOGLE SHEETS document, in which only sensitive data such as usernames and wallet addresses will be hidden. Only the unique code printed on the NFTs you have obtained will be visible.**
- When claiming your free NFT to participate in the AIRDROP, we will not charge you anything to get it, but to mint the NFT, you have to pay the gas fee which**

is not up to us. We have preferred POLYGON/MATIC because their gas rates are low. We have chosen OPENSEA because it is the largest NFT market that exists so far and it is a market that everyone knows and is easy to use and understand.

- The ELECTHRONS that you have stored will be sent to your wallet for free, without you having to do anything, from the moment you accumulate them, they are yours so that you can do everything you want when you receive them. But you will have to be patient because they will be deposited after the financial ecosystem has been launched, once we have finished the private sale, in which you can also participate if you want, the link is on our website.
- You must consider that we will launch a new chain of blocks, so it is very likely that you will have to add the data of our chain of blocks to your wallet in order to receive the ELECTHRONS that you have accumulated, but we will be reporting all this on our social networks, so we recommend you to be attentive, to receive any news.
- We recommend you to be attentive to our social networks, because there we will publish everything related to our financial ecosystem, the airdrop and more, such as games, contests, prizes, launch dates of each of the platforms, launch dates of the entire ecosystem in general and news about what we do. It will be much easier for you to participate if you stay active and updated about the content on our social networks.
- All free NFTs we give out to the community contain a unique code starting with ELTH*****. You can only have one such free NFT registered per wallet and associated with your social media accounts.
- The ELECTHRONS you earn are stored in the unique NFT code, which is automatically transcribed to the GOOGLE SHEETS document. When we have finished the AIRDROP, we will send all the ELECTHRONS that you have earned to the wallet that has been associated with that unique code. If you have several codes associated with the same wallet or have claimed several free NFTs, with different accounts and wallets, we recommend that you accumulate everything in a single account and in a single wallet only when you have received all your prizes, only then.
- If you have different wallets and multiple social media accounts, you can claim as many free NFTs as you want, but you can only have one free NFT per wallet and per social media. If you register more than one free NFT per wallet, only the first one will be valid, the other will be canceled and you will not be

able to receive ELECTHRONS or prizes. If you want to claim several free NFTs, we recommend using different accounts and different wallets, so you don't run the risk of losing what you have earned. So you can continue participating without problems and earn much more.

- If you transfer or exchange the free NFT we are giving you to another wallet or give that free NFT to someone else, all ELECTHRONS you have stored there will be forfeited, as will any prizes you have won. You also cannot register more than one free NFT per wallet or social network. But you can have other unique codes associated with the same account, as long as those unique codes do not start with ELTH*****. To get more unique codes you must buy them at OPENSEA, there you can increase your chances of winning.

HOW TO GET MORE UNIQUE CODES.

If you want to increase your chances of winning and get more ELECTHRONS, more prizes, more NFTs, you can get more NFTs to participate in this AIRDROP in OPENSEA. These new NFTs also have unique codes and you can have as many as you want, because they don't start with ELTH*****, but with other sequences of numbers and letters.

To buy more NFTs and increase your chances of earning more ELECTHRONS, you just have to mint these NFTs from our website. These new NFTs have the same function as free NFTs and also allow you to accumulate more ELECTHRONS, but they also have several advantages that free NFTs do not have. Of these NFTs you can have as many as you want, because they will allow you to accumulate even more ELECTHRONS in your wallet.

To add the new unique codes you have purchased, use the Telegram Bot, just like you do with free NFTs.

DIFFERENCE BETWEEN THE TYPES OF NFT.

These are the main differences between the free NFT and the other NFTs in this AIRDROP:

Free NFT from the AIRDROP.

- You can only have one per wallet.
- They give you ELECTHRONS and prizes only for raffles.
- The free NFT lottery only gives out low amounts of ELECTHRONS.

NFT of the AIRDROP.

- You can have as many associates as you want per wallet.
- They allow you to accumulate ELECTHRONS automatically without draws.
- The AIRDROP NFT lottery can deliver

- In giveaways, you can only win basic NFTs.

- high amounts of ELECTHRONS.
- In the giveaways, you can win NFT 2.0 creatures and properties in the Infinity Lormirian metaverse, other NFTs, and benefits.

HOW TO TAKE PART.

It is simple:

Step 1. You enter the link, mint your free NFT, which has a cost of \$0, but you have to pay the POLYGON/MATIC gas fee (this is not up to us). You can also buy as many NFT AIRDROP as you want. The link is on our website.

Step 2. You register the unique code of the free NFT, in the Telegram BOT.

Step 3. You participate in the activities and we take care of the rest.

HOW TO EARN ELECTHRONS.

You can earn ELECTHRONS by participating in the community, sharing images, videos and our content on social networks. You also get ELECTHRONS by doing tasks and having a blast with our activities. That is all.

We will give ELECTHRONS for sharing content on social networks and for winning contests or simply being active. We will be posting content, assignments, and instructions on all of our social media. That's why we invite you to participate, because each activity gives you a different amount of ELECTHRONS and has different characteristics. We will be detailing everything at all times.

All NFTs with a unique code, that you have purchased on OPENSEA and that do not start with ELTH*****, store ELECTHRONS automatically on a weekly basis. That easy you can win and that easy you can participate.

WEEKLY LOTTERY.

We will hold a weekly raffle, to give away between 5 and 10,000 ELECTHRONS among all those who have an NFT with a unique code (including free NFTs and those that have been purchased), which must have been registered using the Telegram BOT.

All AIRDROP NFTs, with a unique code, automatically participate in the lottery,

Electhrons.github.io

Electhrons_Elth

Electhrons_Elth

including those that do not have an owner. There will be a weekly draw for each category. That is, a weekly draw for FREE NFT AIRDROPS and a weekly draw for NFT AIRDROPS. Both draws will be at the same time and each will have a single winner.

If the NFT has an owner, the prize will be stored in the lottery winner's account, in the public document of GOOGLE SHEETS. All accumulated ELECTHRONS will be automatically sent to all holders, when our blockchain is launched.

If the winning code is not associated with any wallet, the prize will be declared void and the prize ELECTHRONS will be used for other community prizes. For this reason, it is convenient to have several unique codes associated with the same wallet, because that way you have more possibilities of winning many more ELECTHRONS.

HOW TO PREVENT SCAMS

We recommend you follow the official channels of our ecosystem, social networks are published on our website and everywhere. To avoid scams consider the following:

- We will never ask you for sensitive data, such as passwords, codes and others. We will only ask you for public data, such as your public wallet address, your Nick on social networks, similar data.**
- If we need sensitive data from someone, we will always notify you publicly first, so that person can contact us. We will always use the official contact channels, provided by the user.**
- If we speak to you for any reason, we will always do so through official channels. We will never send you messages requesting anything, everything is always published on social networks and you will have to contact us.**
- Report those who want to scam you, using the name of our ecosystem or our cryptocurrency, so that we let the rest of our community know through our social networks. This is how we take care of each other.**
- Always communicate with us through our social networks. Keep in mind that we get a lot of requests, so be patient, we'll get back to you, but it might take a while. Although we try to respond to everyone quickly.**
